

AI Food Donation Assistant

SDG - SDG 2: Zero Hunger

Intern Name: Mohammed Abdul Rahman

University: JNTUH University College of Engineering Palair

AICTE Student ID: STU6976153e7cc851769346366

Internship Program: 1M1B AI for Sustainability Virtual Internship

Internship Domain: Artificial Intelligence & Sustainability

Project Title: AI Food Donation Assistant

SDG: SDG 2 – Zero Hunger

Tools Used: Python, Streamlit, Pandas

Duration: 6 Weeks

Problem Statement

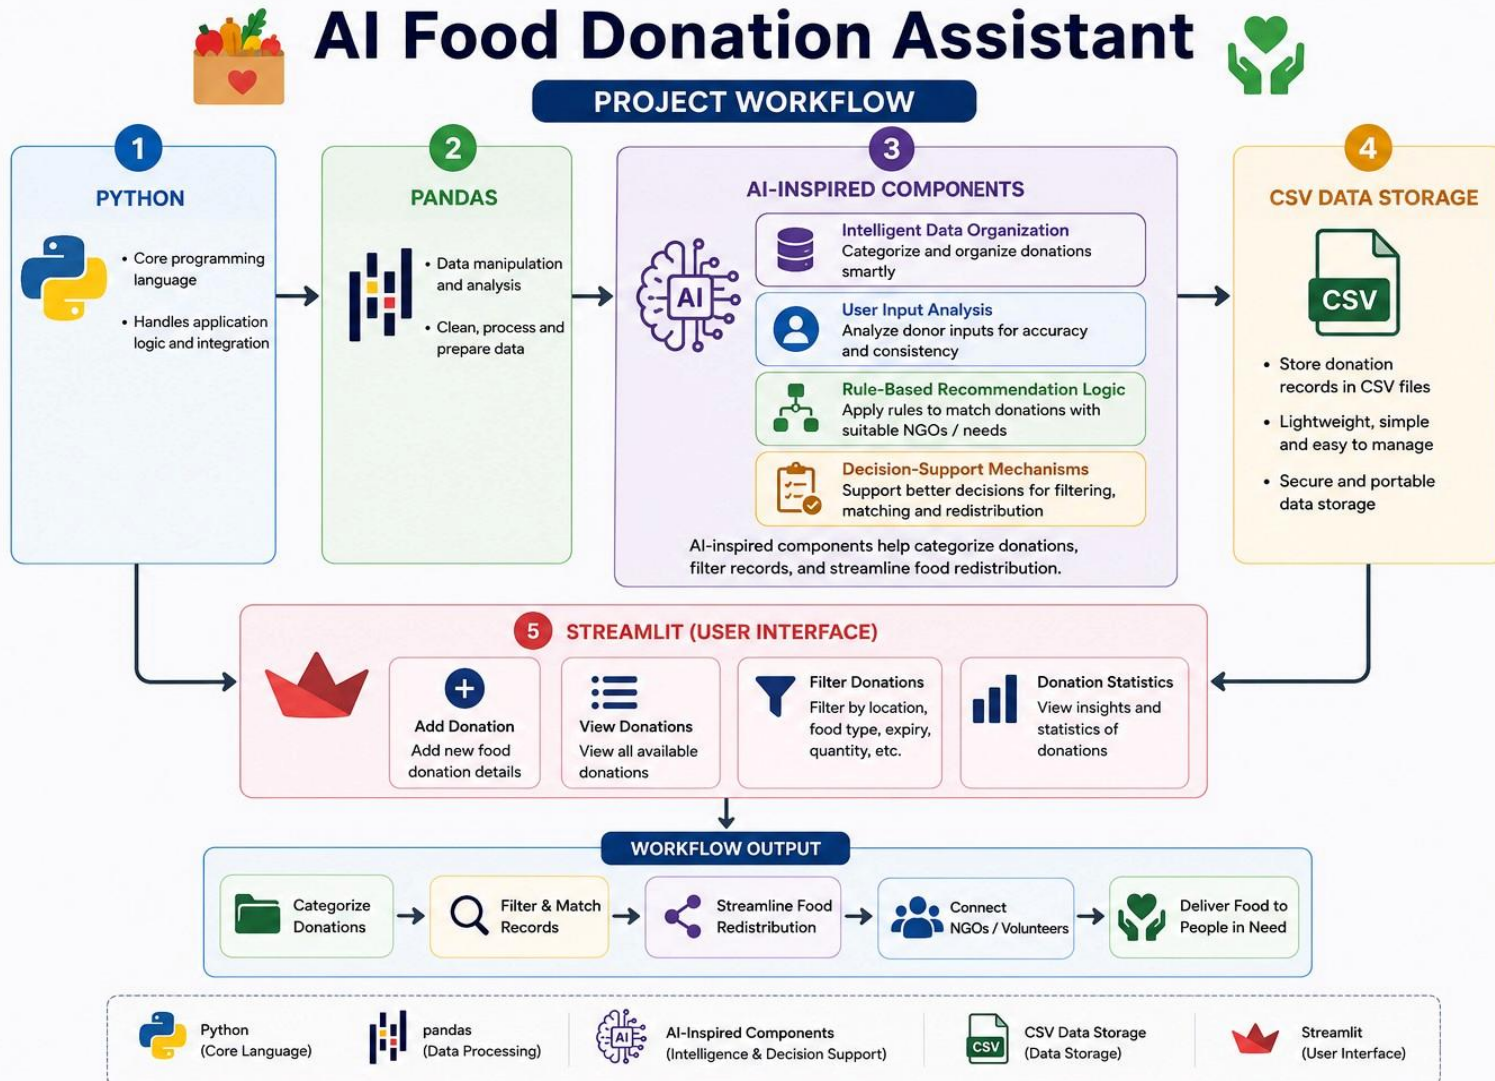

SDG – SDG 2:Zero Hunger

- Food waste and hunger exist simultaneously in many communities. This project aims to help donors share surplus food efficiently and support NGOs and volunteers in reaching people in need.

Proposed Solution

- A Streamlit-based application that records food donations, organizes data, allows filtering of donations, and displays donation statistics.

Project WorkFlow

Technologies Used

- Python
- Streamlit
- Pandas
- CSV Data Storage

AI-inspired Components:

- User Input Analysis
- Intelligent Data Organization
- Rule-Based Recommendation Logic
- Decision Support Mechanisms

Impact

- Supports SDG 2: Zero Hunger by encouraging food donation, reducing food waste, and helping NGOs and volunteers identify available food resources.

Result Images

AI Food Donation Assistant Streamlit application user interface-

The image shows a Streamlit application interface for an AI Food Donation Assistant. The interface is dark-themed with white text. It features a title, four input fields, and a submit button.
